

1 child in Africa **dies** of malaria every 30 seconds.

1,000,000 children a year will **die**.

120 children an hour will **die**.

3000 children a day will **die**.

But here is a small number **7**

And a simple **\$7** bed net can save each one.
\$7 to save the life of a child by protecting that child from malaria infested mosquitoes. A mosquito bite can kill a child in 24 to 48 hours.

Please help. Please give!
