

# Beading Up Malaria

**\$10 Bucks, 1 Bag of Beads, Save Lives!**

Buy-A-Net purchases and resells beads from Bead for Life, supporting sustainable employment, income generation, and entrepreneurial development. This partnership directly helps the beadmakers buy food and medicine, pay school fees, and brings hope to them and their families. Buy-A-Net uses the proceeds of the sale of the beads to buy long lasting-insecticide treated bed nets and anti-malaria medicines for needy families in Uganda.

## About Malaria

Malaria is spread through the bite of an infected mosquito. It is a leading cause of poverty costing Africa \$12 billion each year in lost productivity, trade and health care. But there is hope - malaria is a preventable and treatable disease. Bed nets stop mosquitos from biting during the night, and medicine protects pregnant women, treats, and cures people with malaria.

Charitable Registration No. 85845 2998 RR001

Buy-A-Net Malaria Prevention Group is Canada's first citizen driven initiative aimed at saving lives from malaria. Buy-A-Net raises awareness and funds for the procurement of long-lasting, insecticide treated bed nets, and drug therapies. In partnership with community-based groups, the nets and medicine are distributed free of charge, one village at a time, in Uganda, the group's first target country.
